# SupplyOn: One jointly used industry platform, with 140.000+ business partners

Many of your customers might use SupplyOn already / you benefit from a strong supplier community

As part of the Supplier Community, events and activities are held explicitly for suppliers only. Learn more about the initiative [here](#).

Numerous companies use SupplyOn for global collaboration with their suppliers.  
 You have a central point of access to these companies via SupplyOn.  
 Just talk to your customers about it!

# Comparison of existing TE Portal with SupplyOn: How to stay future-proof

With SupplyOn, TE never walks alone.

## PAST: TE Self-Reliance for Portal / Cost

- All software development need to be orchestrated by TE.
- Highly TE-specific, but no synergies.

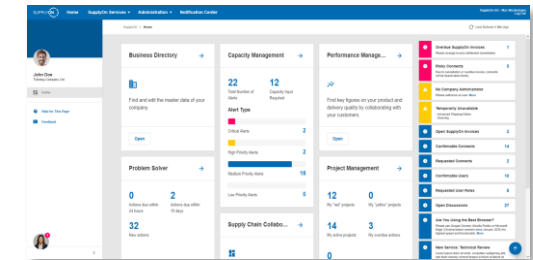

## FUTURE: SupplyOn Agile Portfolio Mgmt. & Community

- TE benefits from synergies with other customers, having similar challenges
- TE-specific configuration & also software changes, fitting into the TE ecosystem
- Many suppliers know & appreciate SupplyOn.

Customers like Airbus, Bosch, Schneider, Siemens trust SupplyOn – with a network of 140000+ business partners.

Via TE-specific development, SupplyOn provides TE-tailored solutions, e.g. for the TE-specific SCC labels

SupplyOn offers a future-proof holistic end2end solution suite, which is regularly being extended, to stay compliant / state-of-the-art in a VUCA world

# We make it easy for you to use SupplyOn
